

### Note:

This access panel is designed to provide easy access for plumbing, electrical, telephone, security system, cable, or sprinkler maintenance. Easy installation between wall studs or ceiling joists, no framing required. Surface is compatible with paint and wallpaper. Child -safe panel door requires a tool (screwdriver) to open.

### Installation

1. Using the frame as template, prepare an opening of the desired size.
2. Apply construction adhesive to the backside of frame flange in a continuous bead for a tight seal.
3. Fit frame into prepared hole. Press flange against wall to ensure flat installation. Check for level. After adhesive is set, snap door into place.
