# Circuit Setter®

Calibrated Balance Valves with Flanged Connections

#### **DESCRIPTION**

The Bell & Gossett Circuit Setter calibrated balance valve is a precision machined triple purpose balancing instrument. It is precisely calibrated for use as a presettable balance valve, variable orifice flow meter and positive shut-off service valve.

Valves are furnished with a calibrated nameplate and memory stop indicator which permits the value to be preset to a fixed open position and then closed for service without disturbing valve setting.

Valves are equipped with capped readout valves fitted with internal check valves. Sizes 2-1/2"-4" (brass ball) include a 1/4" NPT tapped and plugged drain port as standard.

#### **MAXIMUM OPERATING TEMPERATURE**

250°F (121°C)

#### **MAXIMUM WORKING PRESSURE**

175 PSIG (1207 kPa)

# CONSTRUCTION

Sizes 2-1/2"-4"

Body: Cast Iron
Ball: Brass

Seat Rings: Glass and carbon filled TFE Readout Valves: Brass with EPT check valve

Stem "O" Ring: EPDM

#### Sizes 4"-12"

Body & Bonnet - Flanged: Cast Iron Disc: Brass with EPDM insert

Stern: Stainless Steel

Packing: Teflon-Graphite (Asbestos-Free)

Gasket: Synthetic Fiber - Nitrile Binder (Asbestos-Free)

Seal Ring: EPDM

**Bushing: Nickel Plated Steel** 

## TYPICAL SPECIFICATION

Furnish and install as shown on plans and with manufacturer's recommendations Model CB calibrated balance valves.

## PRE-SET BALANCE FEATURE

Valves to be designed to allow installing contractor to pre-set balance points for proportional system balance prior to system start-up in accordance with pre-set balance schedule.

## **VALVE DESIGN AND CONSTRUCTION**

Valves shall be of heavy-duty cast iron {flanged} construction with 125 psi ANSI flange \_\_\_\_\_ connections suitable up to 175 psi working pressure. Valves 2-1/2" - 4" pipe shall have a brass ball with glass and carbon filled TFE seat rings. valves 4" - 12" shall be fitted with a bronze seat, replaceable bronze disc with EPDM seal insert, and stainless steel stem.

# **DESIGN PRESSURE/TEMPERATURE**

175 psig at 250°F

All balance valves to be Xylem Bell & Gossett Model No. CB\_\_\_\_\_(note sizes)

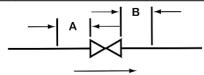

### **IMPORTANT**

When monitoring system flow care must be exercised to avoid direct skin or eye contact with liquids that may escape. Liquids with temperatures in excess of 120°F (49°C) may cause burns.

Bell & Gossett Circuit Setter Balance Valves are not recommended for use with meter connections pointing downward.

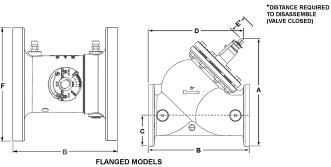

To retain calibrated accuracy, a minimum length of unrestricted straight pipe adjacent to the valve should be maintained as follows:

| SIZE<br>INCHES (mm)       | UPSTREAM "A"<br>(In Pipe Diameters) | DOWNSTREAM "B"<br>(In Pipe Diameters) |
|---------------------------|-------------------------------------|---------------------------------------|
| 2-1/2"-4"<br>(63.5-101.6) | 3                                   | 1                                     |
| 4"-12"<br>(63.5-304.8)    | 5                                   | 2                                     |

Best use results maximize straight pipe length entering and leaving valve. Obstructions or changes in planar flow profiles entering valve may affect accuracy if too close to valve.

SIZES 2-1/2" - 4" SIZES 4" - 12"
