

THERM-X-TROL®

Thermal Expansion Tanks: ST Series Non-ASME

150 PSIG Working Pressure

Construction

Shell	Glass-Filled Composite
Membrane	Patented air cell
System Connection	Composite w/304L SS Waterway
Finish	Matte Tan
Factory Precharge	Sealed; No Adjustment Required

Performance

Maximum Operating Temperature	140°F (60°C)
Maximum Working Pressure	150 PSIG (10.3 bar)
Warranty	7-Year Limited

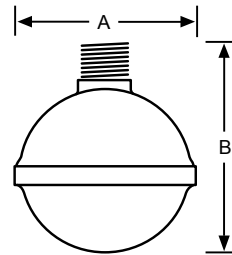

Application

- Protects Tankless and Point Of Use (P.O.U.) water heaters against thermal expansion and water hammer.
- For use in closed, potable water systems to control pressure build-up.
- Meets Manufacturer and Plumbing Code requirements. Prevents relief valve spillage and protects sensitive heat exchangers.

Model
