

Heavy-duty systems for roof-top (RTU) installations. High output UVC lamps produce the strongest germicidal output in the industry, while the PCO process breaks down odors. The NEMA 4-Rated, water-proof and weather-proof enclosure protects the unit and the RTU.

### Lamp Length Options:

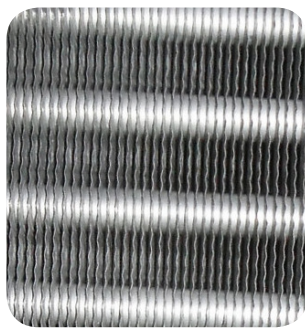

- 3018: 18"
- 2000-230OD: 2 x 18"
- 3024: 24"
- 3032: 32"

### Reduce Maintenance Costs

Clean HVAC coils require less maintenance and reduce the need for chemical cleaning treatments. Even a microscopic layer of mold can reduce efficiency by 40%!

Moldy Coils

Coils With UV Light

### Eliminate Pollutants

Second Wind™ UV air purifiers prevent mold growth on furnace coils, degrade viruses, germs, bacteria, and other airborne pathogens that would otherwise be introduced into the air.

# Commercial / Industrial NEMA Series UV Air Purifiers

## Specifications

Installed on roof-top and outdoor applications, the NEMA 4-Series provide the appropriate UV dose to disinfect mold, bacteria, and infectious disease in the airstream and on coil surfaces.

### Product Features:

- Waterproof / Weatherproof; NEMA 4 Rated Enclosure
- Indoor or Outdoor Installation
- 360° Coverage
- Eradicates Mold, Bacteria, Viruses
- Disinfects Coil & Drain Pan
- Easy to Install / Easy to Service
- 1-Year Lamp Warranty
- 3-Year Ballast Warranty
