

Fluidmaster®

High Efficiency Washing Machine Connectors

For HE Washing Machines for
maximum energy efficiency

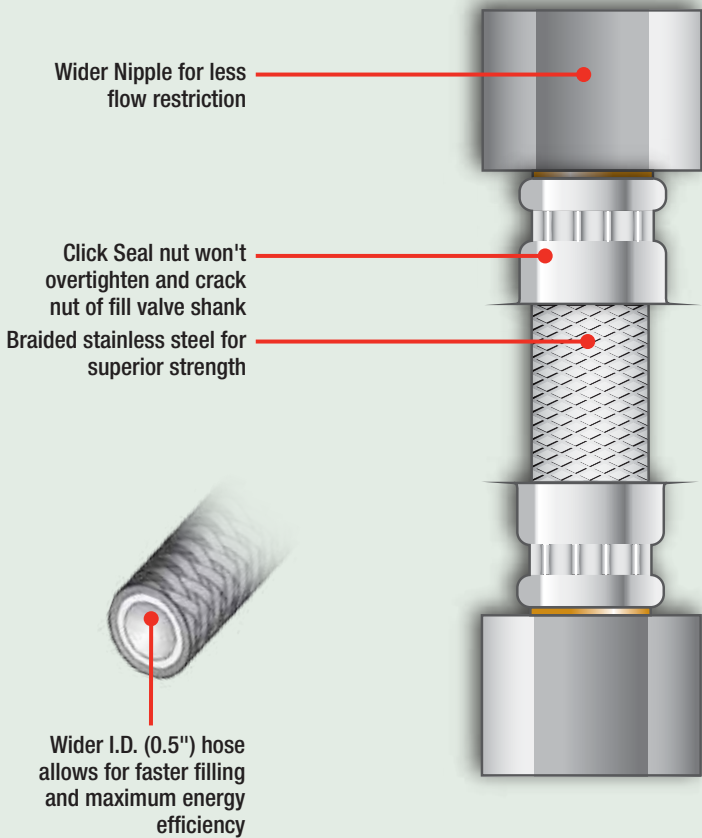

Wider inner diameter hose for
higher flow rate

Stainless steel braiding provides
maximum protection

Available in bulk or carded

**Optimal Performance
for HE Washing
Machines™**

**5 YEAR
WARRANTY**

High Efficiency Washing Machine Connectors

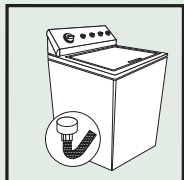

For HE Washing Machines for maximum energy efficiency

Wider inner diameter hose for higher flow rate than standard connectors

Stainless steel braiding provides maximum protection

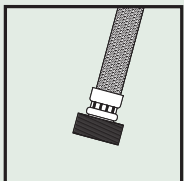

Available in bulk or carded

Provides 45% better flow (0.5" I.D.) **REQUIRED** for an HE washing machine

INSTALLATION INSTRUCTIONS

1. Turn off water.
2. Remove old supply connector and clean all connection threads.
3. Thread nuts onto angle stop and washing machine inlet. Tighten 1/2 turn beyond hand-tight with pliers. **DO NOT OVERTIGHTEN. DO NOT** clean with or expose to household chemical products. Exposure to such products can damage connectors, causing flooding.
4. Slowly turn on water at the angle stop.
5. Carefully check for leaks at angle stop and washing machine inlet. If leak appears, tighten nut just enough to provide a leak-free joint.
