

TEMPASSURE® MEDIUM FLOW CUSTOM SHOWER COMPONENTS

TempAssure® Thermostatic Valves maintain a consistent water temperature within ± 3.6° F (± 2° C) and flow up to 8.6 gpm at 60 psi out of the shower port (see page 127 for full listing of flow rates). Pair the thermostatic valve with a 3 or 6 function diverter to control water flow to shower components. Three function diverters support 2 individual positions and 1 shared position, while 6 function diverters support 3 individual positions and 3 shared positions.
