Applicable Models

- 6VSG
- 30RESA
- 30REYG

Description

Oil makeup kits increase the generator set's oil capacity to extend the engine run time between oil level checks during extended runtimes.

- Extends the oil level check interval from every 8 hours to every 24 hours of engine operation

The kit includes a 2-quart (1.9-liter) oil reservoir and a large sight gauge. The kit is designed to fit inside the enclosure on the generator set models listed above.

The oil makeup kit for the Model 6VSG connects to the generator set controller to provide a warning message when the oil level in the reservoir is low.
