

GEOTHERMAL STORAGE TANKS

Energy-Efficient Electric Booster Tanks, available in 80 or 119-gallon capacities, are specifically designed to meet the need for consistent water temperature and constant hot water supply, 24 hours a day!

Sandhog Low-Watt Density 4500-watt Incoloy Steel Heating Element - Designed to last 2 to 3 times longer than standard copper heating elements

1" Top or 1.5" Side Recirculating Connections - For maximum installation flexibility, piping for outgoing water (to geothermal system) and incoming water (from geothermal system) can be connected through the top or side of the tank. Shipped with side connections plugged.

Diffuser Dip Tube - Reduces lime and sediment buildup, maximizes hot water output. Made from State PEXAN™, a cross-linked polymer that can withstand long-term exposure to temperatures up to 400°F.

Glasslined Tank with Two Anode Rods - Primary and secondary aluminum anode rods provide maximum protection against corrosion

2"-Thick (R-16) Foam Insulation for High Energy-Efficiency

Durable Brass Tamper-Resistant Drain Valve

Factory-Installed Temperature and Pressure (T&P) Relief Valve

Certified to UL 174 for Household Electric Water Heaters

6-Year Limited Tank and Parts Warranty - Consult written warranty or contact State Water Heaters for complete information
