Installation Notes

Install this product according to the installation guide.

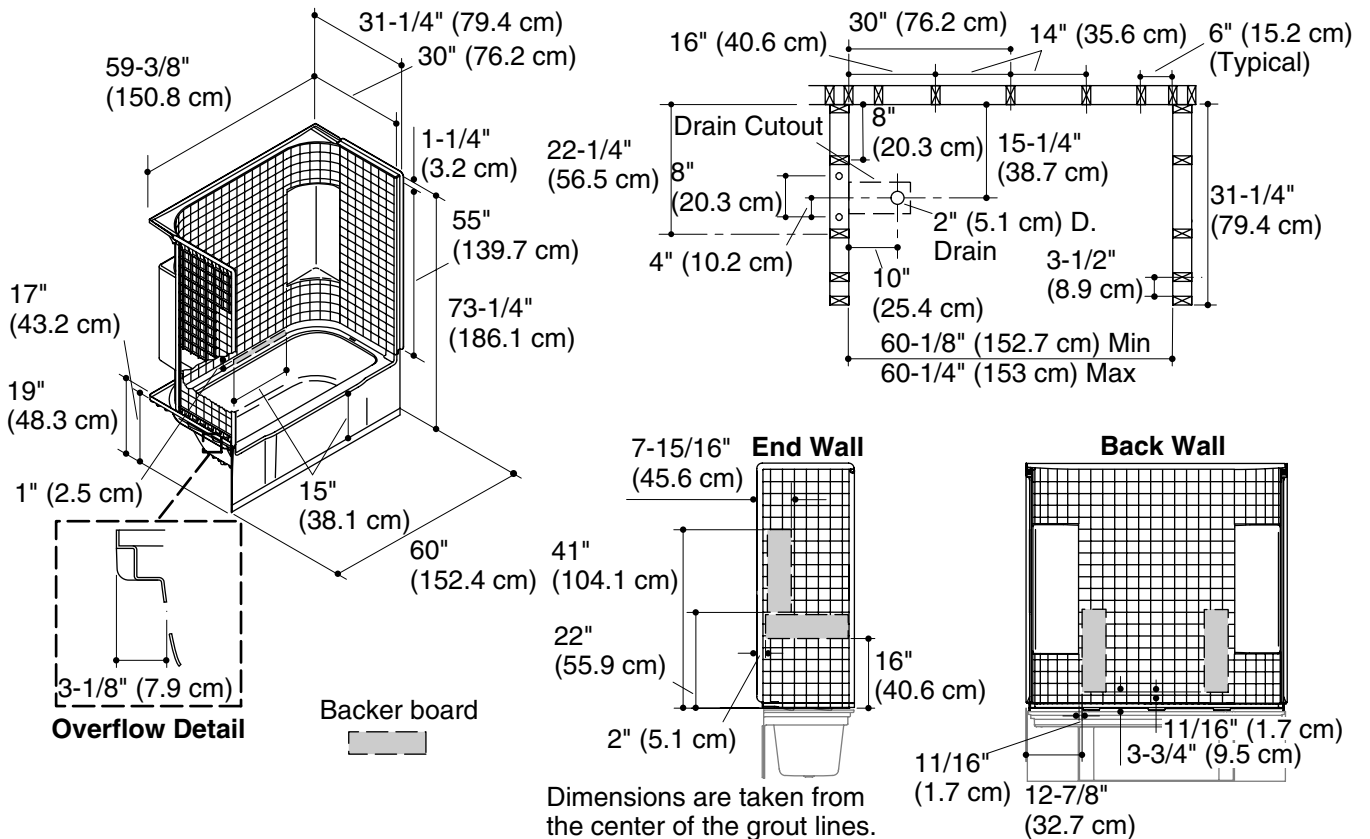

Product is designed to be used with a single-handle mixer valve with an escutcheon cover not to exceed 7-3/4" (19.7 cm) in width.

Size the drain cutout to fit the drain assembly that will be used.

Studs should be positioned roughly as shown.

Bath cannot be installed without the wall surround.

The width of the module gets 5/8" (1.6 cm) narrower at the back. Furring strips (approximately 1/4" (6 mm)) should be used at the back corner studs if the drywall will overlap the nailing flange.
