The "Classic" Waste & Overflow

Easy installation and
testing all in one

AB&A's Classic Waste and Over Flow provides a positive Locknut design enabling the installer to securely tighten the locknut against the tub wall without the use of overflow screws.

Each unit comes complete with the AB&A Test Cap. Simply turn the Test Cap onto the Overflow Elbow and the kit is ready for testing. Once the test is complete, remove the test cap and complete the installation by turning the Overflow Face Plate clockwise onto the Locknut. To remove the Face Plate, continue turning clockwise until loose.

Available in a variety of tub stopper designs and finishes, the Classic is the choice for quick, easy installation and testing.
