

BRASS TUBULAR DISHWASHER TAILPIECE

» 206 SERIES

LongBranch™

SPECIFICATION

Sioux Chief 206 series LongBranch brass tubular dishwasher tailpiece shall be used where necessary in plumbing fixture waste systems. Tailpiece shall incorporate a 1/2" nominal CTS secondary inlet branch for dishwasher or auxiliary drainage. Branch inlet shall be set high, and oriented horizontally, to protect branch connection and conserve space under sinks. Branch inlet shall be tapered downward before entering tailpiece body to reduce splash-up. Designed in accordance with ASME A112.18.2.

MATERIALS

Tailpiece: Tubular brass, 22 Gauge

Nut: Solid brass, Brass-plated zinc die cast

Branch: Copper tube

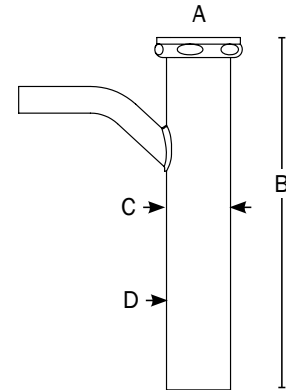

DIMENSIONS

A: Connection type Slip-joint
B: Length 6", 8"
C: Diameter 1-1/2" tubular
D: Gauge 22 Gauge
