# BLUE TOP GAS BALL VALVE

## T-3100

Patented one-piece forged brass body eliminates the possibility of seam leaks common to two-piece body designs\*

Equipped with an integral 1/8" NPT tapped manometer test port and plug, eliminating the need for a separate test port fitting and shutoff valve near the appliance pilot assembly

Ideal for all residential and commercial gas installations

Chrome plated ball and soft seats resist contamination build-up and offer a positive seal in low- or moderate-pressure gas applications

Quarter-turn, ball-type, forged brass design is more compact and superior to traditional cast bronze or cast iron gas cocks

The 175 p.s.i. pressure rating permits high-pressure air tests, without the grease-seal blowout common to plug-type gas cocks

Available in two different configurations, to accommodate all test-port installation requirements

### Working Pressure, Non-Shock (PSI)

Cold working pressure (CWP): 175 psi

Saturated steam (WSP):

Not suitable for steam service

- ANSI standard Z21.15 for use as a gas appliance connector valve for 1/2-lb. systems
- CSA Certified 3-88 for use in 2 or 5 lb. house piping systems
- Threaded end connections conform to ANSI/ASME B1.20.1
- Manufactured in an ISO 9002 accredited facility

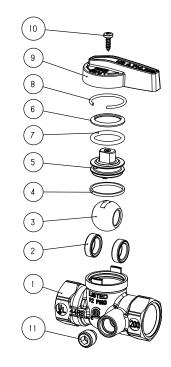

- UL listed 44R8 for the sizes 1/2" and 3/4" within the following categories\*\*
  - YQNZ.MH19347
    Compressed Gas Shutoff Valves
  - YRBX.MH19347
    Flammable Liquid Shutoff Valves

\*Note: part number 102-522 3/8" flare x flare is a two-piece body design. A flared connection is not subject to the high assembly torque common to pipe-threaded connections, thereby greatly reducing the chance of body seam seal failure and subsequent leakage.
