PVC DWV FITTINGS FOR PLUMBING AND MECHANICAL APPLICATIONS

Job Name

Contractor

Job Location

Wholesaler

Engineer

Streamline® Rep

Product Description:

Streamline® PVC DWV fittings for use in applications including sanitary drain, waste, and vent (DWV), sewer, and general drainage applications. Available in sizes ranging from 1-1/4" to 8" in diameter; all fittings should be manufactured in the United States.

Material:

Virgin rigid polyvinyl chloride (PVC) compounds conform to cell class 12454 as defined in ASTM D1784.

Key Specifications:

Streamline® PVC DWV fittings shall be made to meet to ASTM D2665, F1498, and D3311. Third Party Certifications shall be in place for fittings in compliance with NSF Standard 14. Fittings shall be certified to the Uniform Plumbing Code (UPC) where applicable.

Installation:

Installation shall comply with the latest applicable building codes for the local jurisdiction. Solvent cement connections shall be made using a two-step process consisting of primer (in conformance with ASTM F656) and solvent cement (in conformance with ASTM D2564). For detailed installation instructions, consult the Plumbing Apprentice Training Manual available from PPFA (Plastic Pipe & Fitting Association) at ppfahome.org.

PVC DWV fittings are not designed for hot water systems but should discharge temperatures should not exceed 140°F. Systems shall be installed to avoid contact with thread sealants or other chemical agents which are not compatible with PVC. Hydrostatic testing of the system shall be completed prior to use.

Do not test or use Streamline® plastic products with compressed air or compressed gases.
